FEDERAL TRANSIT BUS TEST

Performed for the Federal Transit Administration U.S. DOT In accordance with 49 CFR, Part 665

Altoona Bus Testing and Research Center Test Bus Procedure

2.0 RELIABILITY-DOCUMENTATION OF BREAKDOWN AND REPAIR TIMES DURING TESTING

Pass/Fail October 2016

The Thomas D. Larson Pennsylvania Transportation Institute 201 Transportation Research Building The Pennsylvania State University University Park, PA 16802 (814) 865-1891

Bus Testing and Research Center 2237 Plank Road Duncansville, PA 16635 (814) 695-3404

LTI BUS RESEARCH AND TESTING CENTER

ABBREVIATIONS

ABTC	Altoona Bus Test Center		
A/C	Air Conditioner		
ADB	Advance design bus		
CBD	Central business district		
CI	Compression ignition		
CNG	Compressed natural gas		
CW	Curb weight (bus weight including maximum fuel, oil, and coolant; but		
	without passengers or driver)		
dB(A)	Decibels with reference to 0.0002 microbar as measured on the "A"		
	scale		
DIR	Test director		
DR	Bus driver		
EPA	Environmental Protection Agency		
FFS	Free floor space (floor area available to standees, excluding		
	ingress/egress areas, area under seats, area occupied by feet of seated		
	passengers, and the vestibule area)		
FTA	Federal Transit Administration		
GAWR	Gross axle weight rating		
GL	Gross load (150 lb, for every designed passenger seating position, for		
02	the driver, and for each 1.5 sq. ft. of free floor space)		
GVW	Gross vehicle weight (curb weight plus gross vehicle load)		
GVWR	Gross vehicle weight (euro weight plus gross vehicle loud)		
hr.	Hour		
LNG	Liquefied natural gas		
LTI	Larson Transportation Institute		
mng	Miles per gallon		
mph	Miles per bour		
NBM	New bus models		
PSTT	Penn State Test Track		
rom	Revolutions per minute		
SAF	Society of Automotive Engineers		
SCE	Standard cubic feet		
SCFM	Standard cubic feet per minute		
SCH	Test scheduler		
SA SA	Staff Assistant		
SI	Snark ignition		
SI W	Seated load weight (curb weight plus 150 lb for every designated		
	nassenger seating position and for the driver)		
TD	Test driver		
TM	Track manager		
TD	Text nersonnel		
11	rest personner		

2-I. OBJECTIVE

The objective of this test is to evaluate the reliability of the bus by documenting breakdowns and unscheduled maintenance repairs, down time, and repair time that occurs during testing.

2-II. DESCRIPTION

All breakdowns and repairs that occur during the performance of testing are compiled on the Reliability Data Form. This form summarizes the type of failure, subsystem or part, mileage, and repair time. The failure types will be classified as follows:

- 1. Class 1: A malfunction that represents a potential crash situation and could lead directly to passenger or driver injury.
- 2. Class 2: A malfunction that results in test interruption because the bus cannot be operated. Service is discontinued until the bus is repaired at the site of the malfunction or it is towed to a service workshop.
- 3. Class 3: A malfunction that results in temporary interruption of testing, and the bus must be returned to a service workshop for repair.
- 4. Class 4: A malfunction that degrades bus operations but does not require immediate removal of the bus from testing.

2-III. ARTICLE

The test article is a transit bus with a minimum service life of 4, 5,7,10 or 12 years.

2-IV. TEST EQUIPMENT/FACILITIES/PERSONNEL

The test facility is the ABTC. Test personnel include:

- 1. Staff Assistant (SA)
- 2. Data Supervisor

2-V. TEST DATA

The type of breakdown and the accumulated bus mileage at the time of each failure will be recorded. All forms must be filled out with a pen.

Within each type, breakdowns will be further classified by the specific subsystem or component that failed, e.g., engine, transmission, air conditioning per Table 1 in the Maintainability Procedures. Upon completion of this procedure, all data shall be forwarded to the ABTC manager.

The detailed test preparation and procedures are listed in Procedure 2.1-1. This section also includes Reliability Data Form -2.

DETAILED TEST	PROCEDURES	TITLE: 2. Reliability	
Procedure 2	NOMENCLATURE: 2. Reliability – Documentation of Breakdown and Repair Times During Testing		
OPER STEP	ACTION BY	TEST PREPARATION AND PROCEDURE	
1	ТР	Use pen on all forms	
2	SA	Record the bus number, date, and personnel performing the test on the Reliability Data Form.	
3	SA	Fill out the Reliability Data Form using information obtained from the Repair Order Forms for unscheduled maintenance and the driver log. Record the down time, man-hours to repair, and the bus mileage at the time of failure under the appropriate subsystem.
